APPENDIX A
"CLEAN" VERSION OF EACH PARAGRAPH/SECTION/CLAIM
37 C.F.R. § 1.121(b)(ii) AND (c)(i)

SPECIFICATION:

Paragraph at page 15, line 16, to line 22;

[0041a]   During the periodical communication processing period, the system statically distributes communication band to each communication terminal in accordance with a schedule set in the format ROM section.

[0041b]   Additionally, the system defines a packet length capable of conducting transmission and reception within non-periodical communication processing time periods as the maximum packet length. The system further conducts transmission of only one packet within one non-periodical communication processing time period.

Paragraph at page 19, line 9, to line 12 :

[0054a]   During the initialization processing at step 100:

DW# (Number of Transmission data) = 0

T2P [P(N) - P(N+2) Request Interval #1] = MTU/BWalloc

T2Pb [P(N) - P(N+2) Request Interval #2] = MTU/BWalloc
